Summary:

Renishaw is pleased to announce the launch of a number of easy-to-install variants of the high speed orange cable for use with PH20 and REVO. To satisfy market demand, four new variants of cable have been added to the range of current lengths and configurations.

Further details:

These new cables will come factory fitted with crimped ends to simplify the process of cabling and fitting connectors. The crimped wires will eliminate the requirement for soldering the connectors on to each end; the crimps are simply a push-fit action.

Both ends of the cable will be supplied with heat shrink covering the crimps to ensure they are protected when fed through a machine. A label is also fixed to each end of the orange cable to signify which is the
