PRODUCT BULLETIN – PB1062

Product:	UCCserver™	Status:	OPEN
Title:	UCCserver™ failing to start – illegal system dll	Date:	13 th April 2007

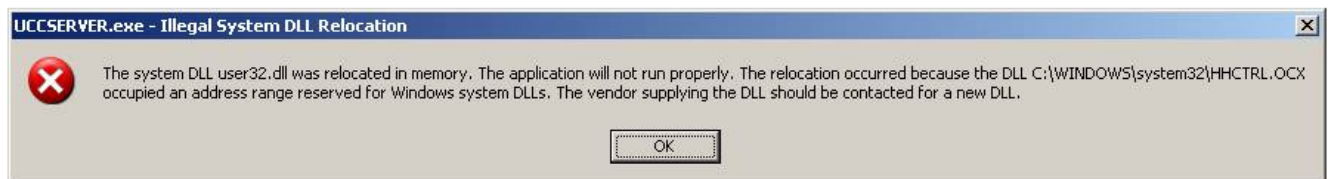

Originator:		Distribution:	
Dave Joynson		Internal	✓
Reviewer:		Subsidiaries	✓
Brian Gow		OEMs	✓
		Distributors	✓
		Retrofitters	✓

Summary:

Microsoft has issued a Security Update for Windows XP (KB925902) which if installed prevents the **UCCserver™** software from running. Upon starting UCCserver™ you will get **UCCserver.exe - Illegal system DLL relocation** message appear and the application fails to run.

Microsoft has recognized that they have created a problem and have posted a patch on their WEB site. The problem is something to do with the installation order of the security updates as the windows updater does not currently have the correct order embedded.

If you see the following:-

Please install the patch from the following site.
